

Drowning is the second leading cause of accidental death in children age 1-14

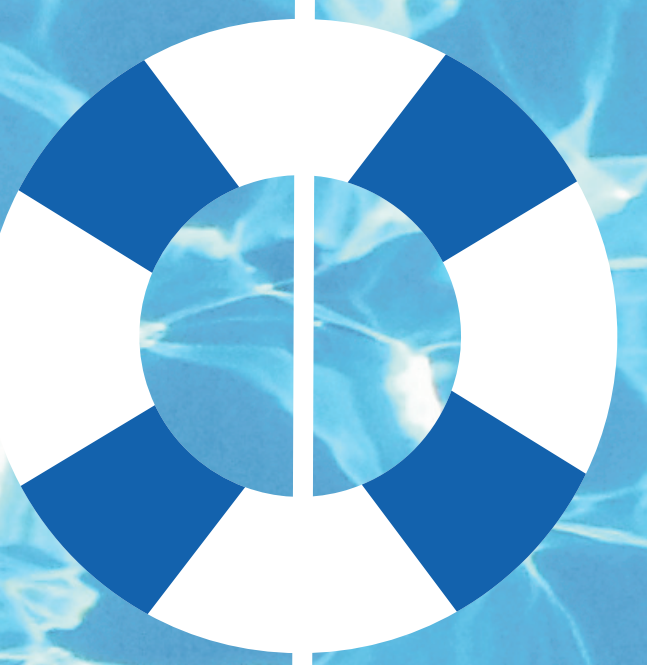

Almost 800 children drown in the US each year.

60% of youth drowning incidents happen within 10 feet of safety.

70% of African American and 60% of Hispanic children cannot swim, compared to just 40% of Caucasian children.

African American children are 3 times more likely to drown than their white peers.

Drowning is Preventable
